

Scent Awareness

Procedure 230

Last Reviewed: March 2024

Statement

Due to health concerns arising from exposure to scented products, and in an effort to support healthy and safe working and learning environments for all, all school buses are deemed scent-free environments. Everyone on the bus, including students, drivers, and monitors should refrain from wearing scented products such as perfume and cologne. Students who wear scented products on buses specifically identified with signage as scent-free will be reported to the school and may be suspended from the bus.

Procedure

In compliance with Occupational Health and Safety guidelines and Human Rights Acts, and where an individual with scent sensitivity has been identified by the Operator, school, school board, or Tri-Board, scent-free signage will be posted on the school bus. Letters will be provided to parents/guardians of bus riders as needed.
